Glass Lamp Wicks.—Lamp wicks of spun
glass are made in Germany. They supply the
petroleum oil or spirit more regularly, and
lamps which are provided with them can be
carried about with less danger of going out or
of scattering sparks and kindling configurations.
For equal strength of flame the glass wicks
give a clearer and purer light; they have a less
unpleasant odor; they consume less fuel; in
spirit-lamps they give a more intense heat, with
a more quiet and steady flame.

ALL ABOUT CALIFORNIA

AND THE

PACIFIC COAST.

Embroidery Department, The Overland Monthly.

THE Pacific Coast, especially Cali-
fornia, is now attracting the at-
tention of thousands of home-seekers
and capitalists. The resources, liter-
ature and history of this vast section
are fully set forth in the pages of
THE OVERLAND MONTHLY. Its sto-
ries of Western adventure, mountain-
eering, Indian studies and Pioneer
sketches have become famous, and are
one of the strongest features of the
magazine. Its literary reviews, edi-
torials and poems rank with the best
of corresponding Eastern work.

The OVERLAND was established
twenty-one years ago. For 1889 we
promise more and better illustrations,
and new writers. Reading Clubs and
libraries find THE OVERLAND

THE NATIONAL Automatic Gas Governor.

33 PER CENT. SAVING IN GAS BILLS GUARANTEED.

Enormous gas bills result from excessive gas pressure. When gas "blows" at the burner, it is being wasted pro rata. The higher the pressure, the less the illumination and the larger the gas bill. The automatic action of Governor, attached to each individual meter, permits the consumer to control his own pressure regardless of the gas company and obligates him to pay for only the minimum supply of Gas required for economic service. Secures a steady and increased illumination, resulting from regular pressure and consequent perfect combustion of the gases, thus insuring a pure and healthful atmosphere. Prevents the disagreeable whistling, blowing and smoking of burners, and consequent injury to ceilings, paintings or drapery. Greatly reduces "Fire Insurance Risks" incident to "Screaming" Gas Jets and Burners, and avoids the frequent danger and expense of broken globes. Special discounts to architects.
